SANSKAR DUMBRE

Computer Engineering Student | Aspiring Software Engineer

+91 8830405039 | dumbresanskar23@gmail.com | Portfolio | LinkedIn | GitHub | Pune, Maharashtra

PROFESSIONAL SUMMARY

Motivated and detail-oriented developer with a strong foundation in full-stack web development and Python. Experienced in building responsive, user-focused applications with modern frameworks, designing REST APIs, and implementing secure authentication. Familiar with databases, real-time features, and payment integrations, with a growing interest in artificial intelligence and its practical applications. Quick learner who enjoys turning ideas into polished, working products and collaborating in team environments. Seeking an opportunity to contribute technical skills and grow as a software engineer.

INTERNSHIPS

MERN Stack Developer Intern | SkillField Mentor *15 June 2026 – 15 July 2026 (1 Month)*

- Developed responsive, component-based front-end interfaces using React.js, HTML5, CSS3, and JavaScript, improving page usability and performance.
- Used Git and GitHub for version control, branching, and collaborative code management throughout the internship.
- Debugged and resolved front-end and back-end issues through systematic testing, strengthening full-stack troubleshooting skills.

Full Stack Development in Python Intern | Sumago Infotech Pvt. Ltd. *Jun 2024 – Jul 2024*

- Completed a 6-week industrial training program in full-stack web development using HTML, CSS, Python and Django Framework.
- Collaborated on real-time team project with version control managed through Git and GitHub.
- Strengthened problem-solving and debugging skills through weekly coding tasks and project reviews.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Engineering *Currently Pursuing*
Dr. D. Y. Patil College of Engineering and Innovation | SGPA: 8.64

Diploma in Computer Engineering *Aug 2022 – 2025*
Samarth Polytechnic, Belhe | Percentage: 88.47%

Secondary School Certificate (SSC) *Jun 2012 – May 2022*
Late Prof. Ramkrushna More English Medium School | Percentage: 79.20%

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, PHP, SQL
Web Technologies: HTML5, CSS3, Bootstrap, React.js, Node.js, Responsive Web Design
Databases: MongoDB, DBMS Concepts
Operating Systems & Networking: Windows, Linux, OS Fundamentals, Computer Networks
Tools & Version Control: VS Code, MongoDB Atlas, Git, GitHub
Relevant Technical Knowledge: Hardware Fundamentals, OS, Computer Networks, DBMS

RELEVANT COURSEWORK

Operating Systems • Computer Networks • DBMS • Data Structures • Computer Organization • Software Engineering • OOP

PROJECTS

Rainbow Preschool Website – Bunnyland Preschool | bunnylandpreschool-talegaon-dabhade.com/

- Designed and developed a responsive, multi-section admissions website to help a local pre-school establish an online presence and streamline parent inquiries.
- Built dedicated sections for programs, photo gallery, and parent testimonials, plus an online enquiry form with Google Maps integration to capture leads and improve accessibility.

MealBook – Digital Canteen & Mess Management Platform | mealbook.in

- Designed and developed a multi-tenant SaaS platform for college canteens and hostel messes to eliminate queues, with a student web and Android app (React, Capacitor), a live kitchen display, and a super-admin console for onboarding clients and managing subscriptions.
- Built a Node.js, Express and MySQL backend with real-time order tracking (Socket.IO), QR-based meal tokens, Razorpay payments, secure JWT/Google OAuth/OTP authentication, role-based access control, and automated cron jobs for order expiry and subscription checks.

IntellxSkill Technologies Website – Cloud Data Analytics & BI Training Program | intellxskill.in

- Designed and developed a responsive, multi-section website for an ed-tech training company to present its Cloud Data Analytics & BI Engineering program, covering curriculum, tools taught (Power BI, Snowflake, Python, SQL, Excel), and job-assistance offerings.
- Built a conversion-focused layout with clear program highlights and calls to action to attract prospective learners, optimized with SEO metadata and a mobile-friendly design for better reach and accessibility.

Fitpulse – Gym Management SaaS Platform | fitpulse-zeta-five.vercel.app

- Designed and developed a responsive, all-in-one gym management web platform to help fitness centers digitize day-to-day operations, including member management, memberships, and attendance, in a single dashboard.
- Built a clean, user-friendly interface with a scalable SaaS architecture and deployed it on Vercel, making it easy for gym owners and staff to track members, streamline workflows, and reduce manual record-keeping.

CO-PO Software – Outcome-Based Education Management Platform (In Development) | co-po-software.vercel.app

- Currently developing a web-based platform to automate Course Outcome (CO) and Program Outcome (PO) mapping and attainment calculation for engineering departments, replacing manual spreadsheet work with a streamlined digital workflow.
- Building a responsive, user-friendly interface for faculty to enter marks and map outcomes, with automated calculations and reports to support accreditation documentation; deployed on Vercel for ongoing testing and iteration.

The Janta Journal – Digital News Platform | news-platform-chi-lovat.vercel.app

- Designed and developed a responsive, multi-section digital news platform presenting national affairs, geopolitics, economy, technology, policy, and cultural coverage in a clean, editorial-style layout with a polished dark theme.
- Built category-based navigation and a reader-friendly interface optimized for readability across devices, with SEO-ready metadata, and deployed it on Vercel for fast, reliable access.

CERTIFICATIONS

Full Stack Developer — Sumago Infotech Pvt. Ltd. • Python Django — Sumago Infotech Pvt. Ltd. • HTML5 — Infosys Springboard

Soft Skills: Communication, Problem Solving, Team Collaboration, Quick Learner, Adaptability, Time Management, Analytical Thinking
